

~Introduction~

Thank you for buying this GEM product.

BLN-AV2R1B is a passive type video/audio balun to allow you to send video & audio signals through CAT5/6 cable and requires no power. The transmission distance is about 2200 feet via a CAT5 cable.

~Installation~

[Step 1] Cable preparation

Run the CAT5 cable between your audio source and the output unit with proper length.

Assemble the RJ45 plug on CAT5 cable. Please refer to the following diagram (fig.1) of standard connection order carefully. Mistakes are easy to make at this point. Please make sure that the cores slide into the RJ45 plug with correct order and all cores go to the end of the plug before crimping. The crimp tool will press the brass pins in to the individual cores and lock the plug on to the cable.

[Step 2] Connect BLN-AV2R1B to your system

Put on the BLN-AV2R1B on both end of the prepared CAT5 cable with RJ45 plug.

Connect the audio/video source on one of the BLN-AV2R1B and connect the output unit (ie. monitors with audio output or DVR etc.) on the other end.

~Important Notice for Installation~

1. The fig.2 shows the connection order for standard CAT5 cable with RJ45 plug.
2. Strip the cable with proper length (10mm) will make the connection stronger and the CAT5 cable will be locked by the RJ45 plug.

fig.1

Looking down at the brass pins on the RJ45 plug
From Left to right:

Pin	Color of Core
1 (Left)	White/Orange
2	Solid Orange
3	White/Green
4	Solid Blue
5	White/Blue
6	Solid Green
7	White/Brown
8 (Right)	Solid Brown

~Trouble Shooting~

[No Picture]

1. Audio/Video source is not working or not power on. Please make sure the source is working normally.
2. The connection of CAT5 and RJ45 plug is not correct please re-check the connection order to standard.
3. The RJ45 plug has not been put on correctly, either with incorrect connection order or the cores are not far enough into the plug and not been crimped properly. Cut off the end again and re-crimp.
4. The cable is damaged or there is a short or open circuit on the wire, please replace the wire.

[Poor Picture]

1. Source is not working properly. Please make sure the source is working normally and sending good quality picture.
2. The RJ45 plug has not been put on correctly, either with incorrect connection order or the cores are not far enough into the plug and not been crimped properly. Cut off the end again and re-crimp.
3. Polarity incorrect with one balun being wired opposite to the other one, please re-wire.
4. Cable run too long. The picture will deteriorate if the CAT5 cable run too long. 2200 feet is the maximum distance for a passive balun to be functioned with adjustments to DVR and monitor. HOWEVER, a maximum distance 650 feet is recommended for using with equipment such as DVRs, multiplexers and quads.

<p>~Specification~</p> <p>Cable-UTP: 24 gauge or lower solid copper twisted pair wire, Impedance: 100ohm at 1MHz Max. capacitance: 20pf/ft Attenuation: 6.6dB/1000ft at 1MHz</p> <p>Cable-BNC: Impedance: 75ohm at 1MHz (RG59/U), Max. 25ft of coax allowed per end to end link</p> <p>Max. distance: Color: 1200ft/Cat.3 ; 2200ft/Cat.5 Monochrome: 1500ft/Cat.3 2500ft/Cat.5</p> <p>Environment required: Operating temp. 0 to 55°C Storage temp. -22 to 85°C Humidity up to 95%</p>	<p>~Electrical Characteristic and Performance~</p> <ul style="list-style-type: none"> • Bandwidth: Video DC to 8 MHz, Audio 20 to 50KHz • Max. input: 1.1Vp-p • Impedance: BNC 75ohm, RCA 600ohm • Insertion loss: Max. 2dB • Return loss: Greater than 15 dB • Common mode rejection: Greater than 40dB at 8MHz • Housing: 81 x 60 x 24mm
